Feedback: That's right! You chose the correct response.

Question 10 Correct

Points: 10/10 | Attempts: 1/2

Drag and drop the words to their places. You have two attempts to complete this question correctly.

User Answer	Correct Answer
There are five positions in basketball. The point guard has good ball handling skills and the ability to guide the team during a play. The shooting guard is often the best shooter and able to shoot accurately from longer distances. The small forward is able to make cuts to get open for shots. The power forward and center make up the front court, often acting as their team's primary rebounders and shot blockers.	There are five positions in basketball.
